PROFESSIONAL TOOLS & EQUIPMENT

tools of the trade... for the trade.

Yes it's here!...

Welcome to the spring/summer Jefferson catalogue, a bumper filled edition with yet more new and exciting lines, check out the centre page spread for an insight into what's new, and look out for the 'new' product symbols throughout the catalogue. We've added 'best seller' symbols through the catalogue to help you find our most popular products in certain sections.

We've been working hard to develop new lines to meet our exacting standards, the power tools section see's the biggest development with our new 'Black Mix' petrol cement mixer and a metal cut off saw, in addition to range developments and extensions throughout the catalogue.

We welcome feedback from our customers and are always working hard to bring our customers the products they want. If you don't see the product you're looking for in our range, please let us know via our website www.jeffersonstools.com, use the contact us section, and let us know what it is.

This catalogue features details, pricing and promotions for the Jefferson range and is valid until July 2014

Best regards from all at the Jefferson Team.

KEEP AN EYE OUT FOR THE NEW THE JEFFERSON BEST SELLER SEAL OF APPROVAL. SCATTERED THROUGHOUT THE CATALOGUE.

DIRECT-DRIVE GEAR BOXES

Direct-drive gear boxes are completely sealed making them ideal to handle a variety of environmental conditions including rain, dust, humidity and anything else mother nature throws at it. Jefferson gearbox pumps are designed for continuous duty use.

SOLID BRASS PUMPS

Industrial and commercial grade pressure washers typically use brass pump heads that do not easily corrode like aluminum and therefore provide thousands of hours of life.

Power factor correction (PFC) means you can use the welder between the voltages 95 - 270V. This is ideal if you are having to use an extension cable up to 100M which normally would result in a drop in voltage. However, with PFC the welder adjusts to voltage drop.

LONG-LIFE BLACK CUT SLUGGER BITS

The Jefferson range of Black Cut Slugger Bits is the culmination of extensive research & development, throughout this process the range was tested against many competitors in various conditions and applications and performed exceptionally well. The function of the unique cutting teeth gives the Black Cut Slugger its peak performance and extends the working life well beyond that of many of our competitors.

WHAT PEOPLE SAY... BLACK CUT

"We started using the Jefferson range of Black Cut slugger bits over the last few months, and are delighted with the performance, we've noticed we are getting far more cuts per cutter than any of the other brands we previously used, we've not calculated the cost saving yet, but we're sure it will add up over the coming months."

Pat O'Neill - JPM Engineering, Co. Tyrone

"Since purchasing the Jefferson Black Cut Slugger Bit range, we have been able to extend our cutting capacity of each slugger by approximately 50% more than other brands we have used previously."

James McAlister - JMF Fabrication, Co. Antrim

BENCH DRILLS / PILLAR DRILLS

Certain drilling jobs require a degree of control and accuracy that is difficult to obtain using hand-held drills. In these instances free-standing drills are usually the best choice as they can be used to clamp the work piece in place and they always drill in precisely the same path each time.

METAL CUTTING DISCS

Whether you need to cut Iron Box section, mild steel or steel reinforcing rod, there's a Jefferson disc to do the job. Our discs come in a variety of bore sizes to suit the most common tools and are manufactured from the highest quality materials.

| Model | Description | Price (Ex VAT) | Price (Inc VAT) |
|-----------|---|----------------|-----------------|
| Jefd01PRO | 4" Metal Cutting Abrasive Disc 16mm Bore | €1.42 | €1.75 |

| Jefd08PRO | 14" Metal Cutting Abrasive Disc 25.4mm Bore | €5.65 | €6.95 |

INOX STAINLESS STEEL DISCS

Due to the particular properties of stainless steel such as its hardness and ductile nature, our INOX steel cutting discs are much slimmer than the standard metal cutting discs.

The range includes our metal case of 10 x 4.5" discs Jefd26PRO/CASE, for easy carrying and storage.

| Model | Description | Price (Ex VAT) | Price (Inc VAT) |
|----------------|---|----------------|-----------------|
| Jefd25PRO | 4" x 1.6mm INOX Cutting Disc 16mm Bore | €1.59 | €1.95 |

| Jefd28PRO | 9" x 1.8mm INOX Cutting Disc 22mm Bore | €3.21 | €3.95 |

STONE CUTTING DISCS

Since the properties of stone or concrete differ greatly from that of steel, the discs required to cut them must also vary. Our stone cutting discs have been optimised for performance in slicing through both natural stone and man-made concrete products.

| Model | Description | Price (Ex VAT) | Price (Inc VAT) |
|-----------|--|----------------|-----------------|
| Jefd10PRO | 4.5" Stone Cutting Abrasive Disc 22mm Bore | €1.59 | €1.95 |

| Jefd13PRO | 12" Stone Cutting Abrasive Disc 20mm Bore | €4.02 | €4.95 |

METAL GRINDING DISCS

When cutting isn't an option, or maybe you only need to reduce the edge of a surface, then you need a grinding disc. Our range of discs have been designed to work efficiently while maintaining durability. Available in a range of sizes to suit most grinders.

| Model | Description | Price (Ex VAT) | Price (Inc VAT) |
|-----------|---|----------------|-----------------|
| Jefd15PRO | 4" Metal Grinding Abrasive Disc 16mm Bore | €1.59 | €1.95 |

| Jefd17PRO | 9" Metal Grinding Abrasive Disc 22mm Bore | €3.62 | €4.45 |

ABRASIVE FLAP DISCS

The abrasive zirconium surface of our flap discs allow for a slower, more controlled removal of smaller amounts of waste material, especially those produced while welding. **New to the range is our Industrial 4.5" Discs which produces even better performance!**

| Model | Description | Price (Ex VAT) | Price (Inc VAT) |
|-----------|---|----------------|-----------------|

CUP BRUSHES

For jobs requiring the removal of rust and other corrosion from metal surfaces our cup brushes are a fast and efficient solution. They are also well suited to the removal of paint or similar surface coatings. While best results are found when used on metallic surfaces, they can be used on others but we would advise that you test a small area first.

G-CLAMPS

Our G-Clamps are manufactured from high quality drop forged steel to ensure that they are a durable, reliable method to immobilise a work piece. There are two types available within the Jefferson range - the coarse thread and a finer variety for those jobs which require a higher degree of control over the clamping force.

TRANSFORMERS

For on-site power that conforms to all current safety regulations, look no further than our range of 110V transformers. The Max Rating refers to the peak power, including the start-up surge common to electrical tools. The continuous rating refers to the maximum load which can be maintained for long periods of time. All have 230V input power.

Polyurethane Sealants

Sealants bond well to a variety of substances and are suitable for permanent elastic sealing and high adhesive bonding. Suitable substrates include concrete, wood, metal, painted surfaces and plastics.

Manufactured through the reaction of glycol and an isocyanate, polyurethane is an organic compound with particularly good moisture and corrosion-resistance characteristics. Thus, polyurethane sealant is useful in both industrial and commercial applications. Additionally, polyurethane is often used as a heavy-duty adhesive, as well as a coating.

As well as being resistant to moisture, chemicals, and corrosion, polyurethane sealant is noted for its flexibility. A common problem with joints is the expansion and contraction of the joint. Polyurethane sealants, with their inherent resiliency, are particularly resistant to cracking due to movement of the joint materials.
